Professional Summary

Entry-level Software Applications Development Engineer with strong foundations in Java, object-oriented programming, SQL, and full-stack application development. Hands-on experience in developing, testing, and deploying applications using Java, Spring Boot, JSP/Servlets, React.js, and MySQL.

Education

Royalaseema University College of Engineering

B-Tech and ECE

2021-2025

CGPA/Percentage: 80

Sri Chaitanya junior college

MPC

2019-2021

CGPA/Percentage: 77

Viswashanthi HS Allagadda

2018-2019

CGPA/Percentage: 90

Technical Skills

- **Programming Languages:** Core Java, Python, Spring boot, Hibernate, OOPS, Multithreading
 - **Frontend:** HTML, CSS, JavaScript, React.JS
 - **Databases:** MySQL, SQL Server
 - **Tools/Servers:** Eclipse, IntelliJ IDEA, VS Code, Apache Tomcat, Ms-office 365
 - **Soft Skills:** Strong attention to detail, Analytical and problem-solving skills, Effective team collaboration, Professional communication, Continuous learning mindset
-

Internships

Java Full Stack Intern – Tap Academy (2025)

- Gained hands-on experience in **Core & Advanced Java, JDBC, J2EE, Servlets, Hibernate, Spring Boot**.
 - Built and deployed multiple full-stack projects, including a **Food Ordering System** using JSP/Servlets and MySQL.
 - Collaborated with team members following Agile/Scrum & SDLC development practices.
 - Maintained technical documentation and followed coding standards.
-

Projects

Food Ordering System (Swiggy Clone) | Java, JSP/Servlets, JDBC, MySQL [GitHub Link](#)

- Developed a full-stack food ordering web app with **user authentication, menu browsing, cart management, and payment simulation**.
- Implemented **MVC architecture** and backend database operations using JDBC & MySQL.
- Deployed on Apache Tomcat with **CRUD operations** and **session management**.

Vegetable Mart – Full Stack Web App

Using React.js, Java Spring Boot, MySQL, REST API, Axios, HTML/CSS

- Built a full-stack vegetable marketplace with **separate Owner and Customer modules**.
- Implemented **inventory management** (add/edit/update/delete vegetables with images).
- Added **real-time stock & price sync** between owner updates and customer view.
- Developed **React.js frontend** with cart, checkout, and live refresh features.
- Built **Spring Boot REST APIs + MySQL** for backend CRUD and validation.

Employee Management System

- Built an Employee Management System using Java Spring Boot and MySQL.
 - Implemented employee CRUD operations with department-role mapping.
 - Added search, filter, and report export functionality.
 - Designed REST APIs and integrated frontend using JSP / React.
-

Achievements

- Actively participated in various cultural activities, demonstrating teamwork and enthusiasm.
-
